SKILLS

Python	Linux	Java	SQL
HTML/CSS/JS	Django	Angular	Bash

EDUCATION

College of Charleston August 2015 — May 2019
Bachelor of Science in Computer Science
Minor in Data Science

EXPERIENCE

Blackbaud January 2019 — May 2019
Student Worker

- Worked for Blackbaud earning class credit for my major's capstone project
- With two other students, used Angular and D3.js to create a web app for visualizing large relational datasets as graphs
- Features included zooming and panning, adding/removing nodes, and filtering out nodes or edges based on several criteria

Booz Allen Hamilton June 2018 — August 2018
Summer Games Intern

- Worked on a team of five interns to create a web application for use by the U.S. Navy to monitor sailor fatigue and proficiency
- Took on a lead developer role, creating the website in Django

Research in Web Development September 2017 — September 2018
Research Assistant

- Assisted Dr. Ayman Hajja with several Django based web projects, including a website to enable researchers to label audio files containing stuttering, and other projects to be teaching aides for Hajja's classes

College of Charleston Computer Science January 2017 — December 2018
Introductory Programming Teaching Assistant

- Gained communication skills by helping students work through introductory Python labs
- Taught the fundamentals of programming: loops, conditionals, functions, etc.
